

**ANYWAY. ANYHOW. ANYWHERE**

**Africa's Remote Site and Facility  
Management Experts**

## Africa's Remote Site and Facility Management Experts

ATS is the largest and most established remote site and facility management provider in Africa.

We exist to challenge boundaries and we operate on the frontiers of development – delivering tailor-made, holistic solutions for our clients that enable the creation of valuable infrastructure and development projects in the most remote locations in Africa.

Whatever the challenge, we have the know-how and can-do attitude to keep you going at peak performance.

## ANYWAY.

Non-existent roads. Rivers without bridges. We take every challenge in our stride to set up and supply our clients' camps.

## ANYHOW.

Remote camps often start as a mere GPS co-ordinate. We establish reliable supply chains and develop dependable local support to link these sites to the world.

## ANYWHERE.

ATS has cross-continental reach. No matter how limited the existing infrastructure or supply connections, we find a way to make your African investment deliver a return.

### ATS Gives Your Business:

Energy optimisation

Facilities/site building

Training

Supply chain

Satellite TV and recreational services including gym

Gate and security guards

Meal/ration packs

# HEALTH AND SAFETY

ATS operates under unique and challenging conditions and is therefore acutely aware of the importance of maintaining a rigorous Occupational Health and Safety regime across its contract base. The implications of a breach are serious – our contract locations are often highly remote, and the costs to our clients of project delays are enormous.

We therefore execute our projects in accordance with the highest benchmarks, ensuring that our staff and those of our clients remain safe in the environments in which they operate.

Over and above all this, we have an internal team that audits operational practices on Occupational Health and Safety in order to drive continuous improvement.

We also have an Africa-wide network of emergency providers that are on-hand to provide support in the event of any mishap.

# ENVIRONMENTAL POLICY

We are committed to running our business in a responsible manner, minimising any negative impact on the environment, the communities that surround our client sites, our employees as well as those of our clients.

We believe that it is the responsibility of everyone involved in Africa's economy to execute their mandates with sensitivity and responsibility. African communities and eco-systems need to benefit from the projects taking place, not be damaged by them.

As such, ATS conducts numerous projects in the areas surrounding our contract locations which are designed to uplift local communities. Our Projects include environmental clean-up operations within the catchment areas, recycling of plastic and waste material, food waste is used as feed at piggeries or turned into composting.

Simultaneously, our staff training, operational processes, inputs used and products marketed are all designed not to harm the environment.

# HSE CERTIFICATIONS

ATS is deeply committed to Health, Safety and Environmental (HSE) policies and procedures. Our food production and service processes conform to GHP (Good Hygiene Practice) as per Codex standards, and we are HSE certified:

- ISO 9001:2015
- OHSAS 18001:2007
- HACCP
- ISO 14001
- ISO 22000:2005

**Over 10 years experience**  
delivering intergrated, full life support solutions to drilling rigs up to 60km offshore. Clients include multinational drillers.

Exploration and Mining

Gas and Oil Exploration

Commercial and Industrial

Oil and Gas Rigs

# OIL AND GAS

As a member of the Tsebo Solutions Group, we have extensive experience of the unique challenges of the oil and gas industry. We understand the demands of taking care of a captive audience for rotations of up to 45 days. We understand that supply chain, food quality and variety, staff attitudes and health and safety matters need to be our daily focus.

We understand rigs, both on and offshore, as well as the harsh physical environments in which these facilities are often located. To service these sites, we offer a comprehensive array of life support services, including catering, laundry, housekeeping, janitorial, logistics, office services and contingency support.

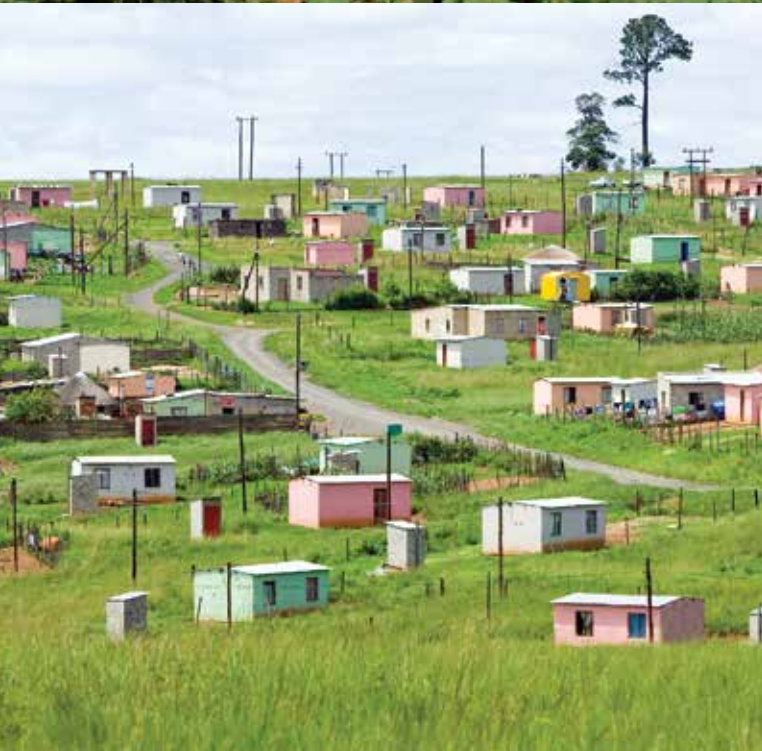

We have an intimate knowledge of the needs, requirements and irritations of a captive market, and how to avoid menu fatigue and service lag. We also have dedicated supervisors that move from site to site to ensure strong communication, regular training sessions, and ongoing internal audit streams.

## SAFETY

We operate according to HACCP (Hazard Analysis and Critical Control Points) and utilise HUET (Helicopter Underwater Escape Training), H2S, First Aid, Fire Fighting and other essential skill requirements as a minimum standard.

# EMPOWERMENT AND COMMUNITY DEVELOPMENT

Transformation has never been a compliance requirement; it is part of our DNA and is woven into our business model, business processes, cultural values and business strategy. We actively create and support equitable, inclusive and sustainable growth and development. We facilitate networking with individuals and businesses within client community catchment zones, and focus on activities that yield maximum social impact.

Our Community Engagement Activity (ATS Legacy) programme uses a participative approach to harness community potential. We partner with local communities and integrate them into the ATS value chain, developing supplier networks and imparting knowledge and experience. This approach achieves the interests of all stakeholders, including shareholders, clients, employees, the community and the environment.

We bring all our experience and knowledge to every ATS contract location, ensuring that the surrounding community benefits both during and after the project, and adhere to a comprehensive guideline for social investment with well-tested management tools and on-going training to address the social needs of communities. We encourage all our clients, suppliers and stakeholders to engage with us in these endeavours.

# \$100 MILLION INVESTED INTO OUR COMMUNITIES IN 10 YEARS

ATS Legacy over the last decade focussed on empowering and creating suppliers from local communities, training and development programs for local suppliers, and social support and integration programs such as support for youth, cultural and traditional programs. Agro-based programs constituted 95% of ATS Community Spend within this decade.

## LOCALISATION

- Level 1 B-BBEE Rating in South Africa
- 95% local employment in every country
- 97% Local Procurement
