

PEST CONTROL SOLUTIONS

Kind to people. Kind to the environment. Proven results.

Tsebo Hygiene Solution's integrated approach to pest management and prevention provides an effective and sustainable approach to pest control. Aside from ongoing housekeeping and maintenance, we make use of technology to provide the best possible 'fit for purpose' service to our clients.

THE CHALLENGE

The definition of a pest is:

- Any organism, usually an animal or insect, seen as a threat to humans or an environment.
- An animal or insect that poses health risks. Most pests transmit illness or disease to humans.
- A living creature that is destructive and a nuisance.

Tsebo Hygiene Solutions' pest control division provides expertise and flexibility in monitoring, managing and removing all forms of pests in and around domestic, commercial and industrial areas. We also provide specialised cleaning and hygiene services in the fast-moving consumer goods (FMCG) environment. We operate across all sectors including retail, production, distribution, healthcare and educational services, and assist food manufacturers with hygiene maintenance. Our integrated pest management (IPM) system along with our preventative management approach is the most 'fit for purpose' method for the effective and sustainable control of pests.

OUR SOLUTIONS

Tsebo Hygiene Solutions offers the following solutions:

Rodent bait control stations

Fly control units

Cockroach treatments
